Notification

Sample Notice for Newspapers	page 52
Sample Notice of Hearing to property owners on Certified list	page 53
Affidavit of Service of Notice	page 54

PLANNING BOARD APPLICATION PROCEDURES

STEP I: APPLICATION SUBMISSION

- A. Completed Land Use Development Application.
- B. Signed Escrow Agreement and W-9 tax form.
- C. All required Fee & Escrow payments as set forth in the Fee Schedule. Application fees are non-refundable. All checks should be made payable to the "Township of Winslow". Separate checks should be submitted for fees and escrow.
 - If Water/Sewer review is required, see fee schedule for this additional required escrow.
- D. Completed Application Checklist and Required Submission Materials as denoted in the Checklist. All Items denoted with an 'X' are required for that type of application. If an item on the Checklist is not applicable or inappropriate, a submission waiver may be requested with justification for such a waiver and require appropriate waiver fees.
- E. Property Owners List Request & associated fee to the Assessor's office
- F. Outside offices submission, signed off by the applicable office and provided to the Board office.

STEP II: COMPLETENESS REVIEW (within 45 Days of submission)

The application will be transmitted to all professionals for review.

- A. Staff and professionals will review the documentation submitted and check to ensure that all items required for submission in the Land Use Development Checklist have been submitted.
- B. All required documentation should be provided, or waivers may be requested from various checklist submission requirements. If necessary, items that have not been submitted, a completeness review will be sent to the applicant (within 45 days of submission) indicating which items are outstanding. The required outstanding items must be addressed prior to the hearing.
- C. Once all necessary items are submitted, the application will be deemed complete and formally scheduled for a hearing date.

STEP III: PUBLIC NOTIFICATION (a minimum of 10 days prior to hearing)

Notice must be provided (pursuant to N.J.S.A. 40:55D-12) in the official newspaper (The Courier Post or The Hammononton Gazette) and to property owners within 200 feet of the subject parcel (utilize list provided by the Assessor's Office). Please review the following instructions regarding proper notice procedures:

- A. Do not provide notice until you have been formally confirmed by the Board Secretary for a Planning Board hearing.
- B. Notice must be provided a minimum of ten (10) days prior to the hearing (not including the date of the meeting) or the application will be rescheduled to a later date, which will require new notice.
- C. Complete the Sample Notice of Hearing to property owners on the certified list.
 - 1. The description of the relief sought must be provided on the form.
 - 2. Copies of the form must be distributed to all persons/entities listed on the Property Owners List either by Certified Mail or Hand Delivery in accordance with N.J.S.A. 40:55D-12.
 - 3. A copy of the Notice of Hearing must also be provided to all utility companies listed on the supplemental sheet attached to the Property Owners List, including the Commissioner of Transportation when a property is adjacent to a State Highway. Notice shall be given by personal service or certified mail to the New Jersey Department of Community Affairs of a hearing on an application for development of property that exceeds one hundred and fifty (150) acres or five hundred (500) dwelling units. Such notice shall include a copy of any maps or documents required to be on file with the Municipal Clerk, pursuant to §6b of c.291 Laws of NJ 1975.
- D. Complete the AFFIDAVIT OF SERVICE OF NOTICE. Sign, notarize, and attach original certified mail receipts.

- E. Complete PUBLIC NOTICE of Planning Board hearing and submit it to the newspaper.
- | | | |
|--|----|--|
| Courier Post News Room | OR | The Hammonton Gazette |
| P.O. Box 5300 | | P.O. Box 1228 |
| Cherry Hill, NJ 08034 | | Hammonton NJ 08037 |
| 888-516-9220 | | 609-704-1939 |
| cplegals@gannett.com | | jwuillermine@innusa.com |

- *Hammonton Gazette runs once a week; verify publication date before sending*
- 1. Legal notices must be submitted to either of the above at least two (2) working days prior to the date to be published. Notice must be published at least 10 days prior to the hearing.
- 2. The description of the relief desired should reflect that of the NOTICE OF HEARING.
- 3. The newspaper will send you an affidavit of proof of publication, which must be submitted to the Department of Planning and Zoning(see Step IV).

STEP IV: SUBMIT PROOF OF NOTICE

The following items must be submitted to the Board Secretary no later than five (5) days prior to the hearing date.

- A. One copy of the Sample Notice for Newspapers and
- B. The AFFIDAVIT OF SERVICE OF NOTICE and
- C. Original certified mail receipts, and
- D. The affidavit of proof of publication from the Courier-Post and/or Hammonton Gazette.

STEP V: PREPARE THE PRESENTATION

The presentation to the Planning Board should be brief and concise but present all relevant facts and address the requested variances. Photographs, sketches, witnesses, and/or any other pertinent information may be presented. The burden of proof is on the applicant since she or he is asking for an exception of the ordinance. The Planning Board is required to consider certain tests in evaluating your application, as specified in the Municipal Land Use Law (M.L.U.L.).

Staff and professionals will prepare a review of each application, which should be addressed at the hearing. Planning Board members and the applicant will receive copies of the review approximately one week prior to the hearing.

All applicants or property owners that are incorporated must be represented by an attorney. Any employed professionals and experts for the applicant will be certified that they possess the appropriate New Jersey licenses prior to any testimony at the Planning Board hearing. The lack of a New Jersey license does not prohibit an individual from testifying but will preclude her or his ability to be certified as an expert witness by the Planning Board.

STEP VI: ATTEND THE HEARING (within 120 days of being deemed complete)

- A. An application must be heard by the Planning Board within 120 days of being deemed complete.
- B. The Planning Board meets the third Thursday of every month, except holidays, in the Court room of the Municipal Building at 125 S. Route 73. The hearing begins at 7:00pm and is preceded by a caucus at 6:30pm, which is open to the public. A corporation, partnership, limited liability company or partnership must be represented by a New Jersey Attorney. The procedure for the hearing is as follows:
 - Pledge of Allegiance & Roll call
 - The Chair determines which applicants are present and announces the order of hearing.
 - When the application is called, the applicant or representative proceeds to the podium.
 - The Chair swears in anyone giving testimony.
 - The Applicant's professionals provide testimony on the application. Board Engineers will review their review letters to address outstanding comments.

- The Board members ask questions after the case is presented.
- The public is then allowed to ask questions or make a sworn statement.
- The Applicant has the opportunity to summarize their application and testimony.
 - The Chair closes the hearing and asks for discussions by the Board. No further comments can be made by the applicant or designated representative or the public.

C. Board agendas are posted on the Township website at <https://www.winslowtownship.com/> before the hearing.

STEP VII: AFTER THE HEARING

- A. The Resolution will be presented and memorialized by the Planning Board within 45 days of decision. A copy of the resolution will be emailed to the applicant, applicant's attorney and professionals (as listed on the application).
- B. Notice of Decision. A Notice of Decision will be submitted by the Board Secretary to the Courier Post for publication within ten (10) days of the memorialization of the Resolution.
- C. Time Period for Appeal. Any party interested in appealing the decision of the Planning Board, must do so within forty-five (45) days of the publication of the Notice of Decision.
- D. Items to Submit After the Hearing:
 1. Conditions of Approval. Any and all conditions of approval must be satisfied (legal documents, additional information, etc.), which should be submitted to the Board Secretary. Staff, Planning Board Engineer, and Solicitor will review. Revise as necessary.
 2. Conformance Plans. Five (5) copies of revised plans, which address needed completeness items and comments from staff and Board professionals, should be submitted to the Planning Board Secretary. The Planning Board Engineer will review and advise if the plans meet the conditions of the approval. They will require revision as necessary.
 3. Cost Estimate. An Itemized cost estimate of all the improvements required. The cost estimate should separate the site work construction items on private property from those within the public rights-of-way. This is the basis for determining the amount of the performance guarantee and inspection escrow.
 4. Developer's Agreement. The applicant's attorney should contact the Board Solicitor to draw up a Developer's Agreement for review. The completed and agreed upon Developers Agreement must be submitted to the Mayor and Township Committee for review and approval at a Township Committee meeting. The signed Developer's Agreement must be recorded in the Camden County Clerk's Office and proof of same needs to be submitted to the Township Clerk, prior to the Township signing off on the Plans.
 5. Escrow. Any outstanding bond payments, inspection escrow, and/or review escrow must be submitted prior to the issue of any permits. Should a positive balance remain in the escrow account after the project is complete and all bills are submitted, a written request for the refund of the remaining escrow must be submitted to the Department of Planning and Zoning.
 6. Pinelands. The applicant shall notify the Pineland Commission of the approval if the development is within the Pinelands area in accordance with 40-41.
 7. Prior to signing off on the plans, from the Township, the following needs to be posted:
 - Performance Bond
 - Inspection Escrow with W-9 of developer
 - Proof of all outside agency approvals, including Pinelands.
 - The recorded Developer's Agreement, filed plat, and/or plans; if applicable.
 8. After the plan is filed at the Camden County Registrar of Deed's Office, you MUST submit evidence that the document(s) have been filed and bear the County's filing stamp. Please return one set of the stamped Plan to the Board office.
 9. A pre- construction meeting should be scheduled with the Department of Planning and Zoning (609.567.0700) with a preliminary construction schedule to be prepared for the meeting, prior to submitting for Zoning permits.

10. Zoning Permit. A Zoning Permit application may be submitted once the above items have been completed. A application fee of \$30.00 for residential projects or \$50.00 for commercial projects is required.
11. A DCA Development fee may apply for new construction of single-family homes and larger development, per Township Ordinance. Similarly, a Non-Residential Development Fee is required for applicable commercial developments, per Township Ordinance.
12. Construction Permits may be applied for at the Construction Department, after Zoning permit approval and a pre-construction meeting is held.

GENERAL APPLICATION INFORMATION:

Site Plan applications- Minor or Major (including Waiver of Site Plan and Change of Use)

Minor Site Plan- A Site Plan of one (1) or more lots which:

- a.) Does not propose the new construction or addition of any building or structure greater than 5,000 gross sq. ft.
- b.) Does not disturb more than 10,000 gross sq. ft. of land area
- c.) Requires 15 or fewer off-street parking spaces
- d.) Is not a planned development, as defined by N.J.S.A. 40:55D-1 et seq.
- e.) Does not involve the extension of any new street or off-tract improvement; and
- f.) Contains information sufficient to make an informed judgement as to whether the requirements established by this chapter for the approval of a Minor Site Plan have been met.

Major Site Plan- Any Site Plan not meeting the definition of a Minor Site Plan.

1. The applicant shall submit the following plans/reports at the time of filing:
 - a.) Five (5) **Full Sets of Plans** to the Planning & Zoning Office
 - b.) Sixteen (16) copies (11" x 17") of the overall development plan (just one sheet).
 - c.) Four (4) copies of any and all reports
 - d.) A digital download version of the submittal via drop box, one drive, or on a flash drive.

Variance applications:

1. The applicant shall submit twelve (12) copies of a survey or plot plan showing location of variance requested at 11 x 17 size, dated within 5 years of the proposed application and showing current conditions of the property.
2. A digital download version of the submittal via drop box, one drive, or on a flash drive.
3. **Variance approvals expire in one year, if not acted on.**

Subdivision applications:

Minor Subdivision- In the Non-Pinelands Areas of the Township of Winslow, a minor subdivision is any subdivision containing not more than three (3) lots fronting on an existing minor street, not involving any new street or road or the extension of municipal facilities and not adversely affecting the development of the remainder of the parcel or adjoining property and not in conflict with any provision or portion of the Master Plan, Official Map, Zoning Ordinance or this chapter; in the Pinelands Areas of the Township of Winslow, a minor subdivision is any subdivision containing not more than four (4) lots fronting on an existing minor street, not involving any new street or road or the extension of municipal facilities and not adversely affecting the development of the remainder of the parcel or adjoining property and not in conflict with any provision or portion of the Master Plan, Official Map, Zoning Ordinance, or this chapter.

Major Subdivision- All subdivisions that are not classified as minor subdivisions.

1. The applicant shall submit the following plans/reports at the time of filing:
 - a.) Five (5) **Full Sets of Plans** to the Planning & Zoning Office
 - b.) Sixteen (16) copies (11" x 17") of the overall development plan (just one sheet).
 - c.) Four (4) copies of any and all reports
 - d.) A digital download version of the submittal via drop box, one drive, or on a flash drive.

PRIOR APPROVAL REQUIRED, related to properties within Pinelands

Properties within the Pinelands areas require **a Pinelands Certificate of Filing**, prior to applying for Winslow Township approvals for Site Plan (including waiver of site plan & change of use) and Subdivision applications.

The applicant shall file with the Secretary of the Planning and Zoning Board, at least (30) days prior to the monthly scheduled meeting of the Board.

18. DISCLOSURE STATEMENT (circle all that apply)

Pursuant to N.J.S.A. 40:55D-48.1 & 48.2, please answer the following questions:

Is this application to subdivide a parcel of land into six (6) or more lots?	Yes	No
Is this application for a variance to construct a multiple dwelling of twenty-five (25) or more units	Yes	No
Is this application for approval of a site (or sites) for non-residential purposes?	Yes	No
Is the applicant a corporation?	Yes	No
Is the applicant a limited liability corporation?	Yes	No
Is the applicant a partnership?	Yes	No

If you responded YES to any of the above, please answer the following (use additional sheets if necessary):

List the names and addresses of all stockholders or individual partners owing at least 10% in stock of any class or at least 10% of the interest in partnership (whichever is applicable).

Does a corporation or partnership own 10% or more of the stock in this corporation or partnership? If yes, list the names and addresses of stockholders of that corporation holding 10% or more of the stock or 10% or greater interest in that partnership (whichever is applicable). This requirement is to be followed by every corporate stockholder or partnership, until the names and addresses of the non-corporate stockholders and individual partners with 10% or more ownership have been listed.

LAND USE PROCEDURES

40 Attachment 6

Exhibit "F" Stormwater Checklist (Section 40-33.2F) (Part 1)

Stormwater Management Information Required to Be Submitted to Commission and Municipality for Review

The following checklist identifies the stormwater management standards that an applicant must address to complete an application with the Pinelands Commission and the concerned municipality (each "Item #" is cross-referenced in the attached Reference Guide).

Note that the stormwater management standards need not be addressed if either:

- The proposed development is minor residential development, resulting in less than five lots or dwelling units, *and* the development does not involve the construction of any new roads; *OR*
- The development proposed is minor nonresidential development, *and* the development does not involve the grading, clearing or disturbance of an area in excess of 5,000 square feet within any five-year period.

Item #	Addressed	Description
1.	<input type="checkbox"/>	Calculations demonstrating that the proposed development meets one of the following three stormwater runoff rate standards:
	<input type="checkbox"/>	Post-development hydrographs for the 2-, 10- and 100-year storms of 24-hour duration will not exceed the predevelopment runoff hydrographs at any point in time [N.J.A.C. 7:50- 6.84(a)6ii(1)l.
	<input type="checkbox"/>	No increase in pre-development rates from the 2-, 10- and 100-year storms will occur. In addition, any increase in stormwater volume for these storms will not increase flood damage at or downstream of the parcel [NJ.AC. 7:50-6.84(a)6ii(2)l.
	<input type="checkbox"/>	The peak post-development runoff from 2-, 10- and 100-year storms will be 50%, 75% and 80% respectively of the pre- development peak rates for the same storms rN.J.A.C. 7:50-6.84(a)6ii(3)l.

LAND USE PROCEDURES

Item #	Addressed	Description
2.	<input type="checkbox"/>	Calculations demonstrating that the total runoff volume generated from the net increase in impervious surfaces by a 10-year storm of 24-hour duration will be retained and infiltrated on site.
3.	<input type="checkbox"/>	Information (soil logs) demonstrating that the lowest point of infiltration of each structural stormwater management measure (e.g. swales, basins, drywells) will meet the two-foot separation to the seasonal high water table (SHWT) standard.
4.	<input type="checkbox"/>	Information demonstrating that the proposed stormwater design will meet the wetland, required buffer to wetlands and surface water protection standards.
5.	<input type="checkbox"/>	Information demonstrating that the soil suitability (permeability rate) standard will be met for all stormwater infiltration facilities (e.g. swales, basins, drywells).
6.	<input type="checkbox"/>	If the development includes High Pollutant Loading Areas (HPLAs) such as gas stations or vehicle maintenance facilities, information which demonstrates that the HPLA standards will be met is submitted.
7.	<input type="checkbox"/>	The groundwater mounding standards will be met.
8.	<input type="checkbox"/>	Information demonstrating that all of the following low impact stormwater design standards will be met (as applicable-see Reference Guide):
	<input type="checkbox"/>	Pretreatment of stormwater, prior to entering infiltration measures has been incorporated into the design,
	<input type="checkbox"/>	The design utilizes multiple, smaller stormwater management measures dispersed spatially throughout the site.
		The design incorporates nonstructural stormwater management strategies identified in the NJDEP stormwater regulations to the maximum extent practical. A written description of each of these strategies must be provided. Alternatively, the results of the NJDEP's NSPS Spreadsheet or Low Impact Design (LID) Checklist may be submitted.

WINSLOW CODE
STORMWATER CHECKLIST
(Part 2)

Additional Stormwater Management Information Required to be Submitted to Municipality for Review

The following checklist identifies certain stormwater management standards that an applicant must address with the municipality (each "Item #" is cross-referenced in the attached Reference Guide). Note that there may be additional information that is required by a municipal ordinance that is not identified in this Pinelands Commission Checklist and Reference Guide.

<u>Item #</u>	<u>Addressed</u>	<u>Description</u>
9.	<input type="checkbox"/>	No direct discharge of stormwater to farm fields will occur to the maximum extent practical.
10.	<input type="checkbox"/>	The Total Suspended Solids (TSS) load in the stormwater will be reduced by 80%.
11.	<input type="checkbox"/>	Stormwater management measures have been designed to reduce the nutrient load in the stormwater runoff from the post-developed site to the maximum extent practical.
12.	<input type="checkbox"/>	The development will meet the groundwater recharge standards.
13.	<input type="checkbox"/>	The stormwater management plan addresses stormwater facilities construction and as-built requirement standards.
14.	<input type="checkbox"/>	The proposed stormwater management measures meet structural design standards.
15.	<input type="checkbox"/>	The development meets stormwater facility safety standards.
16.	<input type="checkbox"/>	A stormwater facilities maintenance plan is provided.

LAND USE PROCEDURES

Stormwater Checklist and Reference Guide

REFERENCE GUIDE

Each Item # identified in Part 1 and Part 2 (the Checklists) corresponds to the Item# in this Reference Guide.

Item #1. The CMP (NJ.AC. 7:50-6.84(a)6ii) provides that stormwater management runoff rate standards may be met through one of the following three options:

I. Demonstrate that the post-developed stormwater runoff hydrographs from the project site for the 2-, 10-, and 100-year storms do not exceed, at any point in time, the site's pre-developed runoff hydrographs for the same storms [(NJ.AC. 7:50-6.84(a)6ii(1)]; or

II. Demonstrate that under post-developed site conditions [(NJAC 7:50- 6.84(a)6ii(2))]:

a. There is no increase in predeveloped stormwater runoff rates from the project site for the two (2), ten (10), and one hundred (100)-year storms; and

b. Any increased stormwater runoff volume or change in stormwater runoff timing for the two (2), ten (10), and one hundred (100)-year storms will not increase flood damage at or downstream of the project site; or

III. Demonstrate that the peak post-developed stormwater runoff rates from the project site for the two (2), ten (10) and one hundred (100) year storms are fifty, seventy-five and eighty percent (50%, 75% and 80%), respectively, of the site's peak pre-developed stormwater runoff rates for the same storms [(NJ.AC. 7:50-6.84(a)6ii(3))]. Peak outflow rates from onsite stormwater measures for these storms shall be adjusted where necessary to account for the discharge of increased stormwater runoff rates and/or volumes from project site areas not controlled by the onsite measures. These percentages do not have to be applied to those portions of the parcel where development is not currently proposed, provided that such areas:

a. Are protected from future development by imposition of a conservation easement, deed restriction, or other acceptable legal measures; or

b. Are subject to review under these standards if they are proposed for any degree of development in the future.

▶ WHAT TO SUBMIT TO THE COMMISSION AND MUNICIPALITY:

__A stormwater management plan prepared as follows:

a. Runoff rates and volumes calculated in accordance with TR-55 and which utilizes an appropriate hydrograph. An alternative method may be utilized, provided that information is submitted which demonstrates that the methods of the alternative method are at least as protective as the NRCS methodology.

b. Stormwater runoff calculated by separately calculating then combining runoff from pervious and directly connected impervious areas within each drainage area.

c. Calculations of runoff from unconnected impervious surfaces, based on the Two-

WINSLOW CODE

Step Method described in the NJDEP's BMP Manual.

d. Rainfall data in the stormwater calculations shall use appropriate 24-hour rainfall depths as developed for the project site by the National Oceanic and Atmospheric Administration, available online at: <http://hdsc.nws.noaa.gov/hdsc/pfds/index.html>.

e. Pre-development runoff CN values have been assumed to be woods in good condition, or follow standard criteria noted in the NJDEP Stormwater Regulations (N.J.A.C. 7:8 5.6(a)2) as follows:

- When selecting or calculating Runoff Curve Numbers (CNs) for pre-developed project site conditions, the project site's land cover shall be assumed to be woods in good condition. Another land cover may be used to calculate runoff coefficients if such land cover has existed at the site or portion thereof without interruption for at least five (5) years immediately prior to the time of application and the design engineer can document the character and extent of such land cover through the use of photographs, affidavits, and/or, other acceptable land use records. If more than one land cover has existed on the site during the five (5) years immediately prior to the time of application, the land cover with the lowest runoff potential shall be used for the computations. All pre-developed land covers shall be assumed to be in good hydrologic condition and, if cultivated, shall be assumed to have conservation treatment.

- Where tailwater will affect the hydraulic performance of a stormwater management measure, the design engineer shall include such effects in the measure's design.

f. In calculating pre-developed site stormwater runoff, the design engineer shall include the effects of all land features and structures such as ponds, wetlands, depressions, hedgerows; and culverts that affect pre-developed site stormwater runoff rates and/or volumes.

g. Calculations submitted for the purposes of demonstrating consistency with the stormwaters volume and rate standards of the CMP shall not include any credit for infiltration in any stormwater BMP during the 2-, 10- or 100-year storm events.

h. Pre- and post-development drainage areas maps have been provided which identify the concentration pathways. The maps and calculations include all applicable off-site and on-site areas.

i. Tc and CN calculations have been provided.

j. Information is provided for each stormwater management measure which demonstrates how each was designed in accordance with the guidance provided by the NJDEP's BMP Manual.

Identify which of the three above noted stormwater rate provisions is being addressed to meet the stormwater runoff standards [N.J.A.C. 7:50-6.84(a)6ii(1, 2 or 3)].

A written narrative to accompany the above calculations describing the method that was utilized to complete the calculations and that includes the size of each drainage area, the pre- development runoff rates of each drainage area, the post-development runoff rates and volumes generated, the routed rates and volume of runoff for each storm event.

If proposing to demonstrate compliance utilizing N.J.A.C. 7:50-6.84(a)6ii(1), applicants must provide copies of all pre- and post-development hydrographs.

LAND USE PROCEDURES

_If proposing to demonstrate compliance utilizing N.J.A.C. 7:50-6.84(a)6ii(2), applicants must provide a build-out analysis for each of the affected drainage areas. When performing this analysis for pre-developed site conditions, all off-site development levels must reflect existing conditions. When performing this analysis for post-developed site conditions, all off-site development levels must reflect full development of the affected drainage area in accordance with current zoning and land-use ordinances.

_If proposing to address the stormwater runoff rate standards utilizing MAC 7:50- 6.84(a)6ii(3), applicants must provide the post development runoff rate reductions for the 2-, 10- and 100-year storms (minimum reductions of 50%, 75% and 80%, respectively). If portions of the parcel are not included in the rate calculations because they will remain vacant, the applicant must either:

- a. Indicate whether a recorded deed restriction will be imposed on that portion of the site not to be developed, or
- b. Provide a note on the plans indicating that any development proposed in these areas in the future must meet the stormwater standards in place at that time.

Item #2. The total runoff volume generated from the net increase in impervious surfaces by a ten (10) year, twenty-four (24) hour storm shall be retained and infiltrated onsite [N.J.A.C. 7:50-6.84(a)6iii(1)].

► WHAT TO SUBMIT TO THE COMMISSION AND MUNICIPALITY:

_A written description of the amount of pre- and post-development impervious area as defined by Table 2-2a in TR-55 within each drainage area along with a calculation of the required volume, of stormwater that must be retained to meet this standard.

_Volume tables for each stormwater management measure that includes the volume retained to the elevation of the lowest outlet.

_Information which demonstrates compliance with volume infiltration and retention standard. The submitted report must demonstrate that the proposed retention/infiltration facilities can retain and infiltrate the volume generated from the net increase in impervious surfaces by a ten (10) year, twenty-four (24) hour storm.

Item #3. Stormwater infiltration facilities must be designed, constructed and maintained to provide a minimum separation of at least two (2) feet between the elevation of the lowest point of the bottom of the infiltration BMP and the seasonal high water table [NJ.A.C. 7:50- 6.84(a)6iii(1)].

►

► WHAT TO SUBMIT TO THE COMMISSION AND MUNICIPALITY:

_A plan depicting the location of all soil tests.

_Soil log descriptions for the requisite number of test pits in the vicinity of the stormwater facilities in accordance with the following:

- a. A minimum of two (2) soil test pits must be excavated within the footprint of any proposed infiltration facility to determine the suitability and distribution of soil types present at the site.

WINSLOW CODE

- b. Placement of the test pits must be within twenty (20) feet of the facility perimeter, located along the longest axis bisecting the facility.
- c. For facilities larger than ten thousand (10,000) square feet in area, a minimum of one (1) additional soil test pit must be conducted within each additional area of ten thousand (10,000) square feet.
- d. The additional test pit(s) must be placed approximately equidistant to other test pits, so as to provide adequate characterization of the subsurface material.
- e. In all cases, where soil and/or groundwater properties vary significantly, additional test pits must be excavated in order to accurately characterize the subsurface conditions below the proposed infiltration facility.
- f. Soil test pits must extend to a minimum depth of eight (8) feet below the lowest elevation of the basin bottom or to a depth that is at least two (2) times the maximum potential water depth in the proposed infiltration facility, whichever is greater.
- g. A soil test pit log must be prepared for each soil test pit and provide the following:
 - provide the elevation of the existing ground surface;
 - the depth and thickness (in inches) of each soil horizon or substratum;
 - the dominant matrix or background and mottle colors using the Munsell system of notation for hue, value and chroma;
 - the appropriate textural class as shown on the USDA textural triangle;
 - the volume percentage of coarse fragments (larger than two (2) millimeters in diameter);
 - the abundance, size, and contrast of mottles;
 - the soil structure, soil consistence, and soil moisture condition, using standard USDA classification terminology for each of these soil properties;
 - identify the presence of any soil horizon, substratum or other feature that exhibits an in-place permeability rate less than one (1) inch per hour;
 - the depth to seasonally high water level, either perched or regional; and
 - the static water level based upon the presence of soil mottles or other redoximorphic features, and elevation of observed seepage or saturation.

Item #4. There will be no direct discharge of storm water runoff from any point or nonpoint source to any wetland, wetland transition area (wetland buffer) or surface water body. In addition, storm water runoff shall not be directed in such a way as to increase the volume and rate of discharge into any surface water body from that which existed prior to development of the parcel.

LAND USE PROCEDURES

WHAT TO SUBMIT:

_A development plan depicting wetlands boundaries, wetlands transition areas (buffers) and surface water bodies, and the location of all discharges or stormwater runoff from structural facilities and non-structural stormwater management measures.

_If there is an existing discharge to wetlands, provide calculations which demonstrate that the stormwater volume and rate of runoff will not increase after development.

Item #5. Stormwater infiltration facilities shall be sited in suitable soils verified by testing of undisturbed soil samples collected in the field, performed under direct supervision of a Professional Engineer, to meet the following [N.J.A.C. 7:50-6.84(a)6iv(2)]:

I. To have permeability rates of between 1 and 20 inches per hour;

II. A safety factor of two shall be applied to the design of the infiltration basin when performing any mounding (Item #7, below) and drain time analysis;

III. The minimum acceptable "tested permeability rate" of any soil horizon or substratum shall be one (1) inch per hour. Soil materials that exhibit tested permeability rates slower than one (1) inch per hour shall be considered unsuitable for stormwater infiltration. The maximum reportable "tested permeability rate" of any soil horizon or substratum shall be no greater than twenty (20) inches per hour regardless of the rate attained in the test procedure;

IV. If the maximum permeability rate of 20 inches per hour cannot be met but will be exceeded, stormwater must first be routed through a bioretention system prior to infiltration or soil replacement may be proposed; and

V. If the soils are slower than one (1) inch per hour and the soils cannot be replaced with suitable soils, the infiltration facility may be required to be relocated.

▶ WHAT TO SUBMIT TO THE COMMISSION AND MUNICIPALITY:

_Results of permeability testing of undisturbed soil samples from the field taken below the bottom elevation of each stormwater management measure. Permeability tests must follow the methodologies outlined in the municipal land use ordinances.

_A minimum of one (1) permeability test shall be performed at each soil test pit location. The soil permeability rate shall be determined using test methodology as prescribed in N.J.A.C. 7:9A-6.2 (Tube Permeameter Test), 6.5 (Pit Bailing Test) or 6.6 (Piezometer Test). When the tube permeameter test is used, a minimum of two replicate samples shall be taken and tested. Alternative permeability test procedures may be accepted by the approving authority provided the test procedure attains saturation of surrounding soils; accounts for hydraulic head effects on infiltration rates, provides a permeability rate with units expressed in inches per hour and is accompanied by a published source reference.

_A plan containing cross section detail(s) of all stormwater BMPs alongside soil profile descriptions (to scale).

Item #6. The High Pollutant Loading Area (HPLA) standards apply where the proposed development includes areas that are defined as HPLAs in NJDEP stormwater regulations

WINSLOW CODE

(NJAC 7:8-5.4(a)2iii(l)). HPLAs include areas in industrial and commercial development where solvents, and/or petroleum products are loaded, unloaded, stored or applied; areas where pesticides are loaded, unloaded, or stored; areas where hazardous materials are expected to be present in greater than "reportable quantities" as defined by the USEPA at CFR 302.4; areas where recharge would be inconsistent with NJDEP approved remedial action work plan or landfill closure plan; areas of high risk for spills of toxic materials such as gas stations and vehicle maintenance facilities and areas of industrial stormwater exposed to "source material."

Where stormwater runoff is exposed to high pollutant source material, the stormwater management plan shall demonstrate the following design criteria are met [N.J.A.C. 7:50- 6.84(a)6iii(2)]:

- I. The extent of the areas described as HPLAs have been minimized on the development site to the maximum extent practicable;
- II. The stormwater runoff from the areas described as HPLAs are segregated to the maximum extent practicable from the stormwater runoff generated from the remainder of the site such that commingling of the stormwater runoff from the areas described as HPLAs and the remainder of the site will be minimized;
- III. The amount of precipitation falling directly on the areas described as HPLAs are minimized to the maximum extent practicable by means of a canopy, roof or other similar structure that reduces the generation of stormwater runoff;
- IV. The stormwater runoff from, or commingled with, the areas described as HPLAs for the Water Quality Design Storm; shall be subject to pretreatment by one or more of the following stormwater BMPs, designed in accordance with the New Jersey BMP Manual to provide 90 % TSS removal:
 - a. Bioretention system;
 - b. Sand filter;
 - c. Wet ponds which shall be hydraulically disconnected by a minimum of 2 feet of vertical separation from the seasonal high water table and shall be designed to achieve a minimum 80% TSS removal rate;
 - d. Constructed stormwater wetlands; and/or
 - e. Media filtration system manufactured treatment device with a minimum 80% TSS removal as verified by the New Jersey Corporation for Advanced Technology and as certified by NJDEP.
- V. If the potential for contamination of stormwater runoff by petroleum products exists onsite, prior to being conveyed to the pretreatment BMP required in IV. above, the stormwater runoff from the areas described in I. and II. above shall be conveyed through an oil/grease separator or other equivalent manufactured filtering device to remove the petroleum hydrocarbons. The applicant must provide the Commission with sufficient data to demonstrate acceptable performance of the device.

LAND USE PROCEDURES

▶ WHAT TO SUBMIT TO THE COMMISSION AND MUNICIPALITY:

_A plan clearly identifying the areas on-site that are HPLAs.

_A description in writing or on the plans that identifies the actions taken to minimize these areas.

Documentation that demonstrates how the stormwater from the HPLA on the site will meet the 90% TSS removal standard (refer to Item #10, below and Appendix 1).

Item #7. Groundwater mounds resulting from the infiltration of stormwater shall not cause stormwater or groundwater to breakout to the land surface or cause adverse impacts to adjacent water bodies, wetlands or subsurface structures including, but not limited to, basements and septic systems [NJAC 7:50-6.84(a)6iv(3)].

▶ AT A MINIMUM, SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

_A groundwater mounding analysis which considers the maximum design storm and, if the stormwater recharge facility is located near wetlands, the effects of any Radius of Influence (ROI) of the recharge facility on the wetlands. The analysis must provide specific conclusions as to whether each proposed recharge facility will cause stormwater or groundwater to breakout to the land surface or cause adverse impacts to adjacent water bodies, wetlands or subsurface structures including, but not limited to, basements and septic systems. The Professional Engineer's Groundwater Mounding Analysis Certification found in Appendix 2 may be utilized. Please note that if an applicant elects to submit the Certification, the municipality may require a more detailed analysis.

Item #8. To the maximum extent practical, stormwater management measures shall be designed to limit site disturbance, maximize stormwater management efficiencies, maintain or improve aesthetic conditions and incorporate pretreatment as a means of extending the functional life and increasing pollutant removal capacity of structural management facilities. The use of stormwater management measures that are using natural, non-wetland wooded depressions, or multiple infiltration facilities that are smaller in size, and distributed spatially throughout a parcel, rather than the use of a single larger structural stormwater management measure, shall be required to the maximum extent practical [N.J.A.C. 7:50-6.84(a)6iv(4)].

For all major development greater than one acre of disturbance or new impervious surface exceeding 1/4 acre, the following nine (9) nonstructural NJDEP BMPs for stormwater management must be addressed to the maximum extent practical [N.J.A.C. 7:8-5.3]:

I. Protect areas that provide water quality benefits or areas particularly susceptible to erosion and sediment loss;

II. Minimize impervious surfaces and break up or disconnect the flow of runoff over impervious surfaces;

III. Maximize the protection of natural drainage features and vegetation;

IV. Minimize the decrease in the predevelopment time of concentration;

WINSLOW CODE

V. Minimize land disturbance including clearing and grading;

VI. Minimize soil compaction and all other soil disturbance;

VII. Provide low-maintenance landscaping that provides for the retention and planting of native plants and minimizes the use of lawns, fertilizers and pesticides, in accordance with N.J.A.C. 7:50-6.24;

VIII. Provide vegetated open-channel conveyance systems discharging into and through stable vegetated areas; and

IX. Provide other source controls to prevent or minimize the use or exposure of pollutants at the site in order to prevent or minimize the release of those pollutants into stormwater runoff. These source controls shall include, but are not limited to:

- a. Site design features that help to prevent accumulation of trash and debris in drainage systems;
- b. Site design features that help to prevent discharge of trash and debris from drainage systems;
- c. Site design features that help to prevent and/or contain spills or other harmful accumulations of pollutants at industrial or commercial developments; and
- d. Applying fertilizer in accordance with the requirements established under the Soil Erosion and Sediment Control Act, N.J.S.A. 4:24-39 et seq., and implementing rules, when establishing vegetation after land disturbance.

The NJDEP stormwater management rules require that any land area used as a nonstructural stormwater management measure shall be dedicated to a government agency, subjected

to a conservation restriction filed with the appropriate County Clerk's office, or subject to an equivalent restriction that ensures that measure is maintained in perpetuity.

► WHAT TO SUBMIT TO THE COMMISSION AND MUNICIPALITY:

_A description of the specific measures taken in the design of the site that limits site disturbance, maximizes stormwater management efficiencies, maintains or improves aesthetic conditions, incorporates pretreatment as a means of extending the functional life and increasing pollutant removal capacity of structural management facilities, uses natural non-wetland, wooded depressions or multiple infiltration facilities, and shows them distributed spatially throughout a parcel.

A written description of how the proposed development will incorporate the nine (9) nonstructural strategies (see above, I through IX) to the maximum extent practical. Alternatively, the following may be submitted:

The results of calculations utilizing the NJDEP's Non-Structural Point System (NSPS) spreadsheet that can be downloaded at www.state.nj.us/dep/stormwater may be submitted. *(Note that this does not apply to linear development.)*

LAND USE PROCEDURES

_For linear development or development that does not "pass" the NSPS spreadsheet, a copy of the NJDEP's Low Impact Design (LID) Checklist may be submitted in an attempt to demonstrate whether the low impact design standards will be met to the maximum extent practical.

_If the NJDEP point system does not show that the nine (9) nonstructural strategies are being used sufficiently or if one or more of the nine (9) nonstructural strategies will not be implemented to the maximum extent practical, a detailed rationale must be provided in writing which establishes a basis for the contention that maximal use of the strategy is not practicable on the site.

_A plan which specifically identifies all proposed LID strategies including all areas of vegetated conveyance.

_A description of how all non-structural strategies will be preserved and maintained in perpetuity pursuant to N.J.A.C. 7:8-5.3(c).

Note: One of the techniques that has been advocated to meet the low impact stormwater design standards is to reduce the number of units. The Pinelands Commission does not advocate this approach.

Item #9. There will be no direct discharge of stormwater to farmland to the maximum extent practical [N.J.A.C. 7:50-6.84(a)6ii(5)].

‣ AT A MINIMUM, SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

_A development plan which identifies any agricultural uses present on adjacent parcels, and includes the location of all discharges of stormwater runoff from structural facilities and non- structural measures. The plan must demonstrate that no direct discharge of stormwater is occurring onto farmland to the maximum extent practical.

Item #10. Stormwater management measures shall be designed to reduce the total suspended solids (TSS) load in the stormwater runoff from the post-developed site by eighty percent (80%) expressed as an annual average [N.J.A.C. 7:8-5.5].

‣ AT A MINIMUM, SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

_If NJDEP BMPs are utilized in the following calculations ("a" or "b") for the accepted TSS removal, refer to Appendix 1 of this reference guide.

_If the BMP measures utilized are not those noted in Appendix 1, refer to (c) below.

_Total Suspended Solids (TSS) Reduction Calculations: Total Suspended Solids (TSS) Reduction Calculations for the parcel are to be completed as follows:

a. If more than one stormwater BMP in series is necessary to achieve the required eighty percent (80%) TSS reduction for a site, the applicant shall utilize the following formula to calculate TSS reduction:

$R = A + B - (A \times B) / 100$, where:

R = total TSS percent load removal from application of both BMPs; A = the TSS percent removal rate applicable to the first BMP; and B = the TSS percent removal rate applicable to the second BMP.

WINSLOW CODE

b. If there is more than one onsite drainage area, the eighty percent (80%) TSS removal rate shall apply to each drainage area, unless the runoff from the subareas converge on site, in which case the removal rate can be demonstrated through a calculation using a weighted average.

c. Alternative stormwater management measures, removal rates and methods of calculating removal rates may be used if the design engineer provides documentation acceptable to the municipality which demonstrates the suitability of these alternate measures, methods and rates. Any alternative stormwater management measure, removal rate or method of calculating the removal rate shall be subject to approval in writing by municipality and a copy shall be provided to the following:

- The Division of Watershed Management, New Jersey Department of Environmental Protection, PO Box 418 Trenton, NJ, 08625-0418; and
- The New Jersey Pinelands Commission, PO Box 7, New Lisbon, NJ, 08064.

Item #11. Stormwater management measures shall also be designed to reduce the nutrient load in the stormwater runoff from the post-developed site by the maximum extent practicable [NJAC 7:8-5.5(e)].

▶ AT A MINIMUM, SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

A written description of how this standard will be met (refer to Table 4.2 in the NJDEP BMP Manual for guidance).

Item #12. Retain and recharge 100% of sites average annual groundwater recharge volume [N.J.A.C. 7:8-5.4(a)2].

▶ AT A MINIMUM, SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

— One of the following must be provided:

- a. Calculations using the NJDEP Groundwater Recharge Spreadsheet (NJGRS), available in the NJ BMP Manual, Chapter-6 at [http://www.njstormwater.org/bmp manual2.htm](http://www.njstormwater.org/bmp%20manual2.htm);
- b. Calculations using the New Jersey Geological Survey Report GSR-32: A method for evaluating Groundwater Recharge Areas in New Jersey. *Available at <http://www.njgeology.org/geodata/dgs99-2.htm>;
- c. Calculate and recharge the difference in runoff volume between 2-year storms, pre- and post-development; and
- d. An alternate method, if approved by the municipal engineer.

Item #13. Stormwater management facility construction and as-built requirement standards [N.J.A.C. 7:50-6.8.4(a)6iv(5) and N.J.A.C. 7:50-6.84(a)6v].

AT A MINIMUM SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

— A plan with notes that pertain to the following:

- An as-built basin plan will be submitted to the municipal engineer,

LAND USE PROCEDURES

- Specifically demonstrate how the proposed construction will conform with the construction measures outlined in the local land use ordinances and the CMP;
- Detail how the as-built basin permeability testing requirements will be met; and
- If the applicant proposes to utilize light grading equipment when grading lawn areas in order to help meet the low impact design standards of the local land use ordinances and the CMP, the plans must include a note stating so.

_After construction, an as-built plan for all stormwater management

_The results of replicate post-development field permeability tests taken within each constructed infiltration measure.

Item #14. Structural design standards. Stormwater management measures shall be designed as follows [N.J.A.C. 7:8-5.7]:

I. The New Jersey Department of Environmental Protection's Best Management Practices (BMP) Manual shall be utilized for technical guidance;

II. Stormwater management basins shall be designed with gently sloping sides. The maximum allowable basin side slope shall be three (3) horizontal to one (1) vertical (3:1);

III. The establishment of attractive landscaping in and around the basin that mimics the existing vegetation and incorporates native Pinelands plants, including, but not limited to, the species listed in NJ.A.C. 7:59-6.25 and 6.26;

IV. Stormwater infiltration BMPs, such as bioretention systems with infiltration, dry wells, infiltration basins, pervious paving systems with storage beds, and sand filters with infiltration shall be designed, constructed and maintained to completely drain the total runoff volume generated by the basin's maximum design storm within seventy-two (72) hours after a storm event. Runoff storage for greater times can render the BMP ineffective and may, result in anaerobic conditions, odor and both water quality and mosquito breeding problems; and

V. To help ensure maintenance of the design permeability rate over time, a six (6) inch layer of K5 soil shall be placed on the bottom of a stormwater infiltration BMP. This soil layer shall meet the textural and permeability specifications of a K5 soil as provided at N.J.A.C. 7:9A, Appendix A, Figure 6, and be certified to meet these specifications by a Professional Engineer licensed in the State of New Jersey. The depth to the seasonal high water table shall be measured from the bottom of the K5 sand layer.

► AT A MINIMUM, SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

_The plan must be designed in accordance with the above requirements.

Item #15. The following safety standards for structural stormwater management facilities and measures must be addressed [NJ.A.C. 7:8-6.2]

I. If a structural stormwater management measure has an outlet structure, escape provisions shall be incorporated in or on the structure. Escape provisions include the permanent

WINSLOW CODE

installation of ladders, steps, rungs, or other features that provide readily accessible means of ingress and egress from the outlet structure;

II. A trash rack is a device intended to intercept runoff-borne trash and debris that might otherwise block the hydraulic openings in an outlet structure of a structural stormwater management measure. Trash racks shall be installed upstream of such outlet structure openings as necessary to ensure proper functioning of the structural stormwater management measure in accordance with the following:

- a. The trash rack should be constructed primarily of bars aligned in the direction of flow with one (1) inch spacing between the bars to the elevation of the water quality design storm. For elevations higher than the water quality design storm, the bars shall be spaced no greater than one-third (1/3) the width of the hydraulic opening it is protecting or six inches, whichever is less. Transverse bars aligned perpendicular to flow should be sized and spaced as necessary for rack stability and strength;
- b. The trash rack shall not adversely affect the hydraulic performance of either the outlet structure opening it is protecting or the overall outlet structure;
- c. The trash rack shall have sufficient net open area under clean conditions to limit the peak design storm velocity through it to a maximum of 2.5 feet per second; and
- d. The trash rack shall be constructed and installed, to be rigid, durable, and corrosion resistant, and shall be designed to withstand a perpendicular live loading of 300 pounds per square foot.

III. An overflow grate is a device intended to protect the opening in the top of a stormwater management measure outlet structure. If an outlet structure has an overflow grate, such grate shall meet the following requirements:

- a. The overflow grate spacing shall be no more than two (2) inches across the smallest dimension; and
- b. The overflow grate shall be constructed and installed to be rigid, durable, and corrosion resistant, and shall be designed to withstand a perpendicular live loading of three hundred (300) pounds per square foot.

IV. The maximum side slope for an earthen dam, embankment, or berm shall not be steeper than three (3) horizontal to one (1) vertical (3:1); and

V. Safety ledges shall be constructed on the slopes of all new structural stormwater management measures having a permanent pool of water deeper than two and one-half (2.5) feet. Such safety ledges shall be comprised of two steps. Each step shall be four (4) to six (6) feet in width. One step shall be located approximately two and one-half (2 1/2), feet below the permanent water surface, and the second step shall be located one (1) to one and one-half (1 1/2) feet above the permanent water surface.

LAND USE PROCEDURES

‣ AT A MINIMUM, SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

— The plan must be designed in accordance with N.J.A.C. 7:8-6.2.

Item #16. The General Inspection, Maintenance and Repair Plan shall contain the following [N.J.A.C. 7:50-6.84(a)6vii]:

- I. Accurate and comprehensive drawings of the site's stormwater management measures;
- II. Specific locations of each stormwater management measure identified by means of longitude and latitude as well as block and lot number;
- III. Specific preventative and corrective maintenance tasks and schedules for such tasks for each stormwater BMP;
- IV. Cost estimates, including estimated cost of sediment, debris or trash removal;
- V. The name, address and telephone number of the person or persons responsible for regular inspections and preventative and corrective maintenance including repair and replacement;
- VI. Reporting records for maintenance;
- VII. A description of the financing that will ensure the inspection, maintenance and repair of all stormwater management BMPs;
- VIII. The plan must address existing tree and vegetation protection during construction;
- IX. A statement that an inspection, maintenance and repair report will be updated and submitted annually to the municipality;
- X. A description of all preservation measures and maintenance procedures for all non-structural stormwater management measures; and
- XI. A description of all stormwater management measure easements designed to facilitate inspections and maintenance as necessary.

Nonstructural stormwater management strategies protection - The local land use ordinances and the CMP provide that development be designed to meet the nonstructural stormwater management strategy standards of N.J.A.C. 7:8-5.3. These standards require that any land area used as a nonstructural stormwater management measure shall be dedicated to a government agency, subjected to a conservation restriction filed with the appropriate County Clerk's office, or equivalent restriction that ensures that measure is maintained in perpetuity. Any maintenance plan must specify which of these methods will be employed, and how the protection will be implemented [N.J.A.C. 7:8-5.3(c)].

Maintenance requirements - The NJDEP regulations provide that the responsibility for maintenance of stormwater management measures shall not be assigned or transferred to the owner or tenant of an individual property in a residential development or project, unless such owner or tenant owns or leases the entire residential development or project [N.J.A.C. 7:8-5.8].

WINSLOW CODE

▶ AT A MINIMUM, SUBMIT THE FOLLOWING TO THE MUNICIPALITY:

- _A maintenance plan that contains all of the above required information.
- _Copies of all proposed deed restrictions for any land area used as a nonstructural stormwater management measure.
- _Copies of all proposed easements.

LAND USE PROCEDURES

APPENDIX 1

Pollutant Removal Rates for BMPs ¹			
Best Management Practice	TSS Percent Removal Rate	Total Phosphorus Percent Removal Rate	Total Nitrogen Percent Removal Rate
Bioretention Systems	90	60	30
Constructed Stormwater Wetland	90	50	30
Extended Detention Basin	40-60 (final rate based upon detention time; see New Jersey BMP Manual, Chap. 9)	20	20
Infiltration basin	80	60	50
Manufactured Treatment Device	Pollutant removal rates as certified by NJDEP; see Section III.	Pollutant removal rates as certified by NJDEP; see Section III.	Pollutant removal rates as certified by NJDEP; see Section III.
Pervious Paving Systems	80 (porous paving)	60	50
	80 (permeable pavers with storage bed)	0-volume reduction only (permeable pavers without storage bed)	0-volume reduction only (permeable pavers without storage bed)
	0-volume reduction only (permeable pavers without storage bed)		
Sand Filter	80	50	35
Vegetative Filter Strip (For filter strips with multiple vegetative covers, the final TSS removal rate should be based upon a weighted average of the adopted rates shown in Table 2, based upon the relative flow lengths through each cover type.)	60 (turf grass)	30	30
	70 (native grasses, meadow and planted woods)		
	80 (indigenous woods)		
Wet Pond/Retention Basin	50-90 (final rate based upon pool volume and detention time; see NJ BMP Manual)	50	30

WINSLOW CODE

APPENDIX2

PROFESSIONAL ENGINEER'S
GROUNDWATER MOUNDING ANALYSES CERTIFICATION*

Submitted to
STATE OF NEW JERSEY
PINELANDS COMMISSION
POBOX7
NEW LISBON, NJ 08064

Part A. General Information

Pinelands Application Number: _____
Project Location: _____
Municipality: _____
Block(s): _____ Lot(s): _____

1. Facility Location: *Either* latitude and longitude for the approximate center each stormwater infiltration facility, *or electronic map, or site plan.*

Facility a. _____
Facility b. _____
Facility c. _____
Facility d. _____
Facility e. _____

Part B. Professional Engineer's Certification

I hereby certify that, pursuant to the requirements of the Pinelands Comprehensive Management Plan (N.J.A.C. 7:50-6.84(a)6.iv.(3)), I have performed a groundwater mounding analysis for each of the stormwater infiltration facilities identified in Part A, above, for the purpose of assessing the hydraulic impacts on the water table from infiltrating stormwater runoff from the maximum design storm. I further certify that the infiltration of stormwater runoff from the maximum design storm at each of these infiltration facilities will not cause stormwater or groundwater to breakout to the land surface or cause any changes to the hydrology of adjacent water bodies, wetlands or cause adverse impacts to subsurface structures, including, but not limited to basements and septic systems. In performing this analysis, I utilized the following methods:

ESCROW AGREEMENT

This Escrow Agreement made between the applicant hereinafter referred to as "Developer", and the Winslow Township Planning Board or the Winslow Township Zoning Board of Adjustment, (hereinafter) called "Township".

The purpose of this Agreement is to set forth the procedure for Escrow Funds that shall be deposited with the Township at the inception of any application before the Township Zoning or Planning Board.

It is specifically understood between the parties to this Agreement, that the said Escrow referred to herein shall be payable before an application is deemed complete and shall be submitted by the Developer with the application to the Township.

- 1.) The deposit required of the Developer and deposited into the Professional Escrow Account shall cover the fees associated with the required review of the application by the Zoning Board of Adjustment of Planning Board Engineer, Planner or Attorney; and for applications submitted pursuant to N.J.S.A. 40:55 D-70 d, such other professionals as the Township and/or Zoning Board may reasonably require, which review shall include the written report on the application to be submitted to the Board. Prior to drawing monies out of the Professional Escrow Account, each professional engaged by the Board shall submit an Invoice to the Board Secretary for approval by the Township. Following conclusion of the Hearings and Meetings regarding the application, any unused funds deposited by an applicant into the Professional Escrow Account shall be refunded to the Developer upon application and approval by the Township.
- 2.) Deposits received from any Developer pursuant to this Agreement shall be deposited in a Banking Institution or Savings & Loan Association in this State insured by an agency of the Federal Government, or in any other fund or depository approved for such deposits by the State, in an account bearing interest at the minimum rate currently paid by the institution or depository on time or savings deposits. The Municipality shall be responsible to have the Escrow Accounts maintained in accordance with N.J.S.A. 40:55D-53.1.
- 3.) The term Professional Personnel or Professional Service as used herein shall include the service of a Duly Licensed Engineer, Surveyor, Planner, Attorney, Realtor, Appraiser, or other expert or employee of said professional who would provide Professional Service to ensure an application meets performance standards as set forth in the Township Ordinances and other experts whose Testimony is in an area in which the Developer has presented expert Testimony.
- 4.) A Developer may request that the Professional Personnel or Board Professional schedule additional time, in excess of that covered by the monies paid into the

Professional Escrow Account, for review of a specific application.

- 5.) It shall be specifically understood between the Developer and the Township, that any meetings in or out of the professionals office, requested by the Developer, shall be paid for by the Developer for the professionals time out of the Professional Escrow Account.
- 6.) A Developer shall be responsible to reimburse the Municipality out of the Professional Escrow Account for all activities including but not limited to the following:
 - a.) Preparation for and attendance at special meetings requested by the Developer.
 - b.) Review or preparation of Easements, Developers Agreement, Deeds or the like.
 - c.) Review of additional Documentation submitted by the Developer and issuance of any reports relating thereto.
 - d.) Charges for any telephone conference or meeting requested or initiated by Developer, his attorney or any of his experts.
 - e.) Issuance of reports by Professional Personnel to the Municipal Agencies setting forth recommendations resulting from review of any documents submitted by the applicant, site visits and inspections.
 - f.) Any and all other expenses of Professional Personnel incurred and paid by it necessary to process the application by the Developer for developments.
 - g.) Preparation of a Resolution or memorializing Resolutions setting forth findings and conclusions of the municipal agency with respect to an application.
- 7.) No applicant shall be responsible to reimburse the Township for any of the following:
 - a.) Attendance by the Professional Personnel at any regularly scheduled meeting of the Municipal Agency; provided however that the Township shall be entitled to be reimbursed for attendance of it's Professional Personnel at special meetings of the Municipal Agency which were requested by the Developer for the Developer's convenience.
- 8.) The Township shall notify the Developer when said deposit into the Professional Escrow Account appears to be insufficient for any application of the Developer. At that time additional funds shall be deposited into the Professional Escrow Account based on an estimation submitted by the Township to the Developer of the amount of money needed to complete the Developer's application. No site plan, or subdivision shall be signed, nor shall any Zoning Permits, Building Permits, Certificates of Occupancy or any other types of permits be issued with respect to any approved application for development until all bills for reimbursable services have been received by the Municipality from the professional rendering service in connection with such application and payment has been approved by the Municipal Body unless the applicant shall have deposited with the Township an amount agreed upon by the Developer and the Municipal Agency is likely to be sufficient to cover all reimbursable items; and upon posting said deposit with the Township the appropriate maps and permits may be signed and released or issued to the Developer. If the amount of the deposit exceeds the actual cost as approved for

payment by the Municipal Body, the Developer shall be entitled to return of excess deposits together with such interest as allowed by N.J.S.A. 40:55D53.1. But if the charges submitted and approved by the Municipal Body exceed the amount of the deposit, the Developer shall be liable for payment of such deficiency.

- 9.) No Professional Personnel submitting charges to the Township for any services rendered in this Agreement shall charge for any of the services contemplated at a higher rate or in any different manner than would normally be charged to the Township for similar work as ascertained by the Professional's Contract of Employment with the Municipality. Payment of any bill rendered by a professional to the Township with respect to any services or which the Township is entitled to reimbursement under this Agreement shall in no way be contingent upon receipt of reimbursement by the Developer, nor shall any payment to a professional be delayed pending reimbursement from a Developer.
- 10.) The Developer and Township agree that the initial deposit into the Professional Escrow Account shall be made in accordance with Ordinance Chapter 40- 44. It is clearly understood between the parties that due to the complexity and/or the nature of the application, that if said deposit is exhausted before final approval or final hearing on any application is complete, that the Developer shall place additional funds into the Professional Escrow Account upon request to do so by the Township based on an estimation of amount of professional review time necessary to complete the application.

Request for Taxpayer Identification Number and Certification

Give form to the
requester. Do not
send to the IRS.

Print or type See Specific Instructions on page 2.	Name	
	Business name, if different from above	
	Check appropriate box: <input type="checkbox"/> Individual/ Sole proprietor <input type="checkbox"/> Corporation <input type="checkbox"/> Partnership <input type="checkbox"/> Other ▶	<input type="checkbox"/> Exempt from backup withholding
	Address (number, street, and apt. or suite no.)	Requester's name and address (optional)
	City, state, and ZIP code	
List account number(s) here (optional)		

Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 2. For other entities, it is your employer identification number (EIN). If you do not have a number, see How to get a TIN on page 2.

Social security number								
or								
Employer identification number								

Note: If the account is in more than one name, see the chart on page 2 for guidelines on whose number to enter.

Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. person (including a U.S. resident alien).

Certification instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. (See the instructions on page 2.)

Sign Here	Signature of U.S. person ▶	Date ▶
--------------	-------------------------------	--------

Purpose of Form

A person who is required to file an information return with the IRS must get your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to give your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee.

If you are a foreign person, use the appropriate Form W-8. See Pub. 515, Withholding of Tax on Nonresident Aliens and Foreign Entities.

Note: If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

What is backup withholding? Persons making certain payments to you must under certain conditions withhold and pay to the IRS 30% of such payments after December 31, 2001 (29% after December 31, 2003). This is called "backup withholding." Payments that may be subject to backup withholding include interest, dividends, broker and barter exchange transactions, rents, royalties, nonemployee pay, and certain payments from fishing boat operators. Real estate transactions are not subject to backup withholding.

You will not be subject to backup withholding on payments you receive if you give the requester your correct TIN, make the proper certifications, and report all your taxable interest and dividends on your tax return.

Payments you receive will be subject to backup withholding if:

1. You do not furnish your TIN to the requester, or
2. You do not certify your TIN when required (see the Part II instructions on page 2 for details), or
3. The IRS tells the requester that you furnished an incorrect TIN, or
4. The IRS tells you that you are subject to backup withholding because you did not report all your interest and dividends on your tax return (for reportable interest and dividends only), or

5. You do not certify to the requester that you are not subject to backup withholding under 4 above (for reportable interest and dividend accounts opened after 1983 only).

Certain payees and payments are exempt from backup withholding. See the instructions on page 2 and the separate Instructions for the Requester of Form W-9.

Penalties

Failure to furnish TIN. If you fail to furnish your correct TIN to a requester, you are subject to a penalty of \$50 for each such failure unless your failure is due to reasonable cause and not to willful neglect.

Civil penalty for false information with respect to withholding. If you make a false statement with no reasonable basis that results in no backup withholding, you are subject to a \$500 penalty.

Criminal penalty for falsifying information. Willfully falsifying certifications or affirmations may subject you to criminal penalties including fines and/or imprisonment.

Misuse of TINs. If the requester discloses or uses TINs in violation of Federal law, the requester may be subject to civil and criminal penalties.

Specific Instructions

Name. If you are an individual, you must generally enter the name shown on your social security card. However, if you have changed your last name, for instance, due to marriage without informing the Social Security Administration of the name change, enter your first name, the last name shown on your social security card, and your new last name.

If the account is in joint names, list first and then circle the name of the person or entity whose number you enter in Part I of the form.

Sole proprietor. Enter your individual name as shown on your social security card on the "Name" line. You may enter your business, trade, or "doing business as (DBA)" name on the "Business name" line.

Limited liability company (LLC). If you are a single-member LLC (including a foreign LLC with a domestic owner) that is disregarded as an entity separate from its owner under Treasury regulations section 301.7701-3, enter the owner's name on the "Name" line. Enter the LLC's name on the "Business name" line.

Other entities. Enter your business name as shown on required Federal tax documents on the "Name" line. This name should match the name shown on the charter or other legal document creating the entity. You may enter any business, trade, or DBA name on the "Business name" line.

Exempt from backup withholding. If you are exempt, enter your name as described above, then check the "Exempt from backup withholding" box in the line following the business name, sign and date the form.

Individuals (including sole proprietors) are not exempt from backup withholding. Corporations are exempt from backup withholding for certain payments, such as interest and dividends. For more information on exempt payees, see the Instructions for the Requester of Form W-9.

If you are a nonresident alien or a foreign entity not subject to backup withholding, give the requester the appropriate completed Form W-8.

Note: If you are exempt from backup withholding, you should still complete this form to avoid possible erroneous backup withholding.

Part I—Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box.

If you are a resident alien and you do not have and are not eligible to get an SSN, your TIN is your IRS individual taxpayer identification number (ITIN). Enter it in the social security number box. If you do not have an ITIN, see *How to get a TIN* below.

If you are a sole proprietor and you have an EIN, you may enter either your SSN or EIN. However, the IRS prefers that you use your SSN.

If you are an LLC that is disregarded as an entity separate from its owner (see *Limited liability company (LLC)* above), and are owned by an individual, enter your SSN (or "pre-LLC" EIN, if desired). If the owner of a disregarded LLC is a corporation, partnership, etc., enter the owner's EIN.

Note: See the chart on this page for further clarification of name and TIN combinations. **How to get a TIN.** If you do not have a TIN, apply for one immediately. To apply for an SSN, get Form SS-5, Application for a Social Security Card, from your local Social Security Administration office. Get Form W-7,

Application for IRS Individual Taxpayer Identification Number, to apply for an ITIN, or Form SS-4, Application for Employer Identification Number, to apply for an EIN. You can get Forms W-7 and SS-4 from the IRS by calling 1-800-TAX-FORM (1-800-829-3676) or from the IRS Web Site at www.irs.gov.

If you are asked to complete Form W-9 but do not have a TIN, write "Applied For" in the space for the TIN, sign and date the form, and give it to the requester. For interest and dividend payments, and certain payments made with respect to readily tradable instruments, generally you will have 60 days to get a TIN and give it to the requester before you are subject to backup withholding on payments. The 60-day rule does not apply to other types of payments. You will be subject to backup withholding on all such payments until you provide your TIN to the requester.

Note: Writing "Applied For" means that you have already applied for a TIN or that you intend to apply for one soon.

Caution: A disregarded domestic entity that has a foreign owner must use the appropriate Form W-8.

Part II—Certification

To establish to the withholding agent that you are a U.S. person, or resident alien, sign Form W-9. You may be requested to sign by the withholding agent even if items 1, 3, and 5 below indicate otherwise.

For a joint account, only the person whose TIN is shown in Part I should sign (when required). Exempt recipients, see *Exempt from backup withholding* above.

Signature requirements. Complete the certification as indicated in 1 through 5 below.

1. Interest, dividend, and barter exchange accounts opened before 1984 and broker accounts considered active during 1983. You must give your correct TIN, but you do not have to sign the certification.

2. Interest, dividend, broker, and barter exchange accounts opened after 1983 and broker accounts considered inactive during 1983. You must sign the certification or backup withholding will apply. If you are subject to backup withholding and you are merely providing your correct TIN to the requester, you must cross out item 2 in the certification before signing the form.

3. Real estate transactions. You must sign the certification. You may cross out item 2 of the certification.

4. Other payments. You must give your correct TIN, but you do not have to sign the certification unless you have been notified that you have previously given an incorrect TIN. "Other payments" include payments made in the course of the requester's trade or business for rents, royalties, goods (other than bills for merchandise), medical and health care services (including payments to corporations), payments to a nonemployee for services, payments to certain fishing boat crew members and fishermen, and gross proceeds paid to attorneys (including payments to corporations).

5. Mortgage interest paid by you, acquisition or abandonment of secured property, cancellation of debt, qualified tuition program payments (under section 529), IRA or Archer MSA contributions or distributions, and pension distributions. You must give your correct TIN, but you do not have to sign the certification.

Privacy Act Notice

Section 6109 of the Internal Revenue Code requires you to give your correct TIN to persons who must file information returns with the IRS to report interest, dividends, and certain other income paid to you, mortgage interest you paid, the acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA or Archer MSA. The IRS uses the numbers for identification purposes and to help verify the accuracy of your tax return. The IRS may also provide this information to the Department of Justice for civil and criminal litigation, and to cities, states, and the District of Columbia to carry out their tax laws.

You must provide your TIN whether or not you are required to file a tax return. Payors must generally withhold 30% of taxable interest, dividend, and certain other payments to a payee who does not give a TIN to a payer. Certain penalties may also apply.

What Name and Number To Give the Requester

For this type of account:	Give name and SSN of:
1. Individual	The individual
2. Two or more individuals (joint account)	The actual owner of the account or, if combined funds, the first individual on the account ¹
3. Custodian account of a minor (Uniform Gift to Minors Act)	The minor ²
4. a. The usual revocable savings trust (grantor is also trustee)	The grantor-trustee ¹
b. So-called trust account that is not a legal or valid trust under state law	The actual owner ¹
5. Sole proprietorship	The owner ³
For this type of account:	Give name and EIN of:
6. Sole proprietorship	The owner ³
7. A valid trust, estate, or pension trust	Legal entity ⁴
8. Corporate	The corporation
9. Association, club, religious, charitable, educational, or other tax-exempt organization	The organization
10. Partnership	The partnership
11. A broker or registered nominee	The broker or nominee
12. Account with the Department of Agriculture in the name of a public entity (such as a state or local government, school district, or prison) that receives agricultural program payments	The public entity

¹ List first and circle the name of the person whose number you furnish. If only one person on a joint account has an SSN, that person's number must be furnished.

² Circle the minor's name and furnish the minor's SSN.

³ You must show your individual name, but you may also enter your business or "DBA" name. You may use either your SSN or EIN (if you have one).

⁴ List first and circle the name of the legal trust, estate, or pension trust. (Do not furnish the TIN of the personal representative or trustee unless the legal entity itself is not designated in the account title.)

Note: If no name is circled when more than one name is listed, the number will be considered to be that of the first name listed.

TOWNSHIP OF WINSLOW
PLANNING & ZONING
125 SOUTH ROUTE 73
WINSLOW TOWNSHIP, NJ 08037-9422

THIS MUST BE REVIEWED AND SIGNED BEFORE
THE APPLICATION CAN BE PROCESSED
DEVELOPER'S AGREEMENT

I hereby acknowledge that I have received and read this notice and the attached 0-10-07 - Ordinance requiring applicants for Land Development to execute Developer's Agreement.

In Addition

In connection with the post approval process, the Developer needs to submit two duplicate original Developer's Agreement obtained from the Winslow Township Planning/Zoning Board Solicitor's office. The developer must supply to the solicitor's office a copy of the deed to the tract the subject of the application containing the legal description of the premises, along with a copy of the Winslow Township Planning/Zoning Board Engineer's Bond Letter. The developer must also provide to the Winslow Township Planning/Zoning Board Solicitor a list of names and addresses of all individuals owning at least 10% of the Developer entity and/or the property. Once the two duplicate originals have been completed and executed by the Developer, the developer must return same to the Planning/Zoning Board Secretary; she will forward them to the Township Clerk to be placed on the Township Committee agenda for acceptance and authorization to be executed by the Mayor and Township Committee by Resolution. Once the Developers Agreement is accepted by resolution, the Township Clerk will forward same to the Developer to be recorded in the Camden County Clerk's Office. **Once the Developer's Agreement is recorded in the Camden County Clerk's Office and proof of same has been returned to the Township Clerk, then the Development plans can be signed off by the Township if all other conditions are met.**

I understand and agree to proceed with the filing of this/these application(s) for: (Application Attached)
