

# Hello!

\_\_\_\_\_ between the hours of 8am and 5pm, (weather permitting), your street will be given a new Microsurface. Microsurfacing is a thin, tough layer of asphalt emulsion that seals cracks and prevents moisture from penetrating the base. Microsurfacing maintenance helps save tax dollars because it extends the life of the pavement while providing an abrasive, skid-resistant surface.

## **IT IS IMPORTANT THAT YOU COOPERATE**

**With the Public Works Department and  
STAY OFF THE STREET**

**Until the barricades have been removed.**

Wet Microsurface will stick to shoes, clothing and automobiles, so please **DO NOT** walk on it, ride your bicycle on it, or drive over it with your car until the surface is completely dry. If you have any doubts whether it is dry enough, be sure to “test” it first.

**IF YOU PLAN TO USE YOUR CAR THAT DAY: Park it on an  
Adjacent Street.**

**IF YOU HAVE A LAWN SPRINKLER SYSTEM: Please close by  
7am**

You may be inconvenienced for a little while. But, aren't a few hours of inconvenience worth years of well-maintained streets and roads?

Asphalt Paving Systems, Inc. and the Public Works Department thank you for your cooperation.

If weather prohibits work, it will be rescheduled for next day.

If you have any questions, please contact the Public Works Dept. or Asphalt Paving Systems at 609-561-4161.
