Can't attend? The meeting will be recorded and available for viewing after the meeting. Go to <https://www.camdencounty.com/service/public-works/project-concept-developments/>

Camden County and the Delaware Valley Regional Planning Commission (DVRPC) will be hosting an online Public Information Center meeting to inform local residents, officials, businesses and the general public about this Local Concept Development (LCD) study to address the high crash rate and traffic delays at the intersection of Williamstown Road (County Road 536 SPUR) and Erial Road (County Road 706) in Winslow Township, New Jersey.

The purpose of this online Public Information Center meeting is to present the Purpose and Need for this project and to solicit public input and comments towards the alternatives that have been developed. The public is invited and encouraged to comment on the study. This meeting is open to all members of the public.

This is a great opportunity to ask questions:

What is the purpose of this project?

Where are the problem areas?

What improvements will be made?

How do I participate?
